ESAOTE

The Esaote Group

Esaote is one of the principle international groups designing, producing and selling non-invasive diagnostic medical instrumentation.

The Group's principal product line is made up of equipment for ultrasound diagnosis, for dedicated applications in magnetic resonance tomography, and for cardiac and neurological diagnostic examinations. At the moment Esaote is the top company in Europe manufacturing ultrasound equipment. It also supplies turnkeys hospital systems and, in Italy, distributes biomedical equipment made by the top international companies active in the field.

The Group, which has its headquarters in Genoa, maintains a direct presence in Italy, Germany, France, the Netherlands, the United States, China and Argentina. In addition, its products are sold globally through a network of distributors in more than 70 countries located throughout the world. Esaote is the undisputed leader in Italy for the supply of electro-medical products and equipment.

The company employs more than 950 employees, 70% of whom have specialist technical high school diplomas or college degrees in the scientific fields.

Esaote's avant-garde research and development structure includes more than 180 highly qualified workers and collaborates with noted national and international research centers.

For diagnosis in the field of cardiology, Esaote develops advanced systems that meet the specific needs of medical personnel who must combine and manage different cardiac diagnostic methods.

Esaote has also been active in the field of non-imaging neurological diagnosis since 1998 as represented by the company EBNeuro, which provides a vast range of neurophysiological products (i.e., electro-encephalographic, evoked potentials and electromiography).
